199. The plain where pilgrims gather on the 9th day of Dhul Hijjah during the main ritual of Hajj is: Plain of Arafat

200. The historic Farewell Pilgrimage (Hajjat al-Wida) performed by Prophet Muhammad (PBUH) took place in: 10 A.H.

201. The basic structural and functional unit of the human kidney responsible for blood filtering is the: Nephron

202. The tiny air sacs in the human lungs where gas exchange occurs are called: Alveoli

203. A pressure cooker speeds up cooking because increased internal pressure elevates the water's: Boiling Point
204. Food spoils rapidly at room temperature because warmth accelerates the multiplication of: Microorganisms
205. The process by which green plants produce carbohydrates using light, water, and carbon dioxide is: Photosynthesis
206. The green light-absorbing pigment found inside plant chloroplasts is: Chlorophyll
207. The iron-rich protein in human red blood cells that transports oxygen is: Hemoglobin
208. The most abundant gaseous component of Earth's atmosphere by volume (78%) is: Nitrogen
209. The chemical symbol for Gold on the periodic table is: Au
210. The chemical symbol for Silver on the periodic table is: Ag
211. The chemical symbol for Iron on the periodic table is: Fe
212. The essential vitamin synthesized in human skin upon exposure to ultraviolet sunlight is: Vitamin D
213. Deficiency of Vitamin C leads to a bleeding gum disease known as: Scurvy
214. Deficiency of Vitamin A leads to impairment of vision in low light known as: Night Blindness
215. The hardest calcified tissue in the human body covering the crown of teeth is: Tooth Enamel
216. The speed of light propagating in a vacuum is approximately: $3 \times 10^8 \text{ m/s}$
217. The membrane-bound organelle known as the "Powerhouse of the Cell" is the: Mitochondria
218. The metabolic disorder resulting from inadequate production or utilization of Insulin is: Diabetes Mellitus
219. The endocrine gland situated at the base of the brain often called the "Master Gland" is the: Pituitary Gland
220. The meteorological instrument used to measure atmospheric pressure is the: Barometer
221. The instrument used to measure relative atmospheric humidity is the: Hygrometer
222. The electrical instrument used to measure electric current flow in amperes is the: Ammeter
223. The layer of Earth's atmosphere that contains the protective ozone layer is the: Stratosphere
224. The International Standard (SI) unit of electrical resistance is the: Ohm
225. The International Standard (SI) unit of physical force is the: Newton
226. The International Standard (SI) unit of energy, work, and heat is the: Joule
227. Acid rain is primarily caused by atmospheric contamination from industrial emissions of: Sulfur Dioxide and Nitrogen Oxides
228. The primary hydrocarbon gas component of natural gas (Sui gas) is: Methane (CH_4)
229. Dry Ice is the solid state form of: Carbon Dioxide (CO_2)
230. The chemical name for common household table salt is: Sodium Chloride (NaCl)

231. The exact pH value of pure distilled water at standard temperature is: 7.0 (Neutral)
232. Chemical solutions with a pH measurement below 7 are categorized as: Acidic
233. Chemical solutions with a pH measurement above 7 are categorized as: Basic (Alkaline)
234. The primary insect vector responsible for transmitting the Malaria parasite to humans is the female: Anopheles Mosquito
235. The primary insect vector responsible for transmitting Dengue virus is the: Aedes Aegypti Mosquito
236. The planet in our solar system given the nickname "Red Planet" due to iron oxide surface dust is: Mars
237. The largest planet in terms of mass and volume in our solar system is: Jupiter
238. The planet closest in orbital position to the Sun is: Mercury
239. The hottest planet in our solar system due to a dense carbon dioxide greenhouse atmosphere is: Venus
240. The basic structural and functional unit of all living organisms is the: Cell
241. Human blood cells responsible for fighting pathogens and protecting immunity are: White Blood Cells (Leukocytes)
242. Specialized cell fragments in blood essential for forming blood clots are: Platelets (Thrombocytes)
243. The human organ responsible for metabolizing toxins and manufacturing bile and urea is the: Liver
244. The type of curved mirror used as side rear-view mirrors on automobiles to provide a wider field of view is a: Convex Mirror
245. The type of curved mirror used by dentists to view magnified images of teeth is a: Concave Mirror
246. Mechanical sound waves are incapable of propagating through a: Vacuum
247. The boiling point temperature of pure water at sea level on the Fahrenheit scale is: 212°F
248. The freezing point temperature of pure water at sea level on the Celsius scale is: 0°C
249. The theoretical temperature known as absolute zero corresponds on the Celsius scale to: -273.15°C
250. The phase transition process of a liquid converting into vapor below its boiling temperature is: Evaporation

251. Synonym of "Delicious": Tasty
252. Antonym of "Exhaustive": Incomplete (Superficial)
253. Meaning of the word "Preach": To deliver a religious sermon or moral advice
254. Meaning of the word "Curbed": Restrained, restricted, or controlled
255. Appropriate preposition to fill in: "The birds fly ___ the river.": Over
256. Synonym of the word "Abundant": Plentiful
257. Antonym of the word "Artificial": Natural
258. Synonym of the word "Candid": Frank (Honest)
259. Antonym of the word "Diligence": Laziness (Negligence)

341. The iconic satire book "Charag-Tale" was written by the renowned Urdu humorist: Mushtaq Ahmad Yousufi
342. The classic humorous essay collection titled "Pitras Ke Mazameen" was authored by: Pitras Bokhari
343. The acclaimed Urdu psychological novel "Raja Gidh" was authored by: Bano Qudsia
344. The famous humor work "Aab-e-Gum" was written by: Mushtaq Ahmad Yousufi
345. The partition-themed historical novel "Udaas Naslein" was authored by: Abdullah Hussein
346. The famous historical novel "Khaak aur Khoon" depicting 1947 events was authored by: Naseem Hijazi
347. In Urdu grammar classification, the word "Shabash" (Bravo) functions as a: Harf-e-Tahseen (Particle of Praise)
348. In Urdu grammar classification, the word "Afsos" (Alas) functions as a: Harf-e-Ta'assuf (Particle of Grief)
349. The literal English equivalent of the proverb "A figure among cyphers" (Andhon mein kana raja) is: An ignorant man passing as a scholar among fools

350. The idiom "Aab Aab Hona" in Urdu literary usage signifies: To feel deeply embarrassed or ashamed
351. What is the value of x if $3x + 15 = 45$: 10
352. The arithmetic mean of numbers 10, 20, 30, 40, and 50 is: 30
353. If an item priced at Rs. 1200 is sold at a 25% discount, the final sale price is: Rs. 900
354. What is 15% of 400: 60
355. Complete the number series: 2, 6, 12, 20, 30, ...: 42
356. Complete the geometric series: 3, 9, 27, 81, ...: 243
357. Complete the square sequence series: 1, 4, 9, 16, 25, ...: 36
358. Complete the prime number series: 2, 3, 5, 7, 11, 13, ...: 17
359. The sum of all interior angles of any planar triangle is: 180 degrees
360. The sum of interior angles of a planar four-sided quadrilateral is: 360 degrees
361. The perimeter of a square having a single side length of 8 cm is: 32 cm
362. The area of a rectangle with a length of 12 m and a width of 5 m is: 60 square meters
363. The standard geometric formula for calculating the area of a circle is: \pi r^2
364. The standard geometric formula for calculating the circumference of a circle is:2\pi r
365. Solve for y in the algebraic equation $(y/4) - 3 = 5: 32
366. If 5 workers complete a task in 10 days, how many days will 10 workers take at the same rate: 5 days
367. The Least Common Multiple (LCM) of integers 12 and 18 is: 36
368. The Highest Common Factor (HCF) of integers 24 and 36 is: 12
369. Convert the decimal value 0.75 into a simplified fraction: 3/4
370. Express the fraction 4/5 as a percentage value: 80%
371. The ratio of 40 minutes to 2 hours expressed in simplified form is: 1:3
372. If $x^2 = 144$, the positive integer value of x is: 12
373. Evaluate the exponential expression 2^5: 32
374. The square root of the integer 625 is: 25
375. The cube root of the integer 27 is: 3
376. Find the median value of the ordered dataset: 3, 7, 9, 12, 15: 9
377. Find the statistical mode of the dataset: 4, 5, 5, 6, 7, 5, 8: 5
378. The supplementary angle to an angle measuring 70 degrees is: 110 degrees
379. The complementary angle to an angle measuring 40 degrees is: 50 degrees
380. An angle measuring greater than 90 degrees but less than 180 degrees is called an: Obtuse Angle
381. An angle measuring less than 90 degrees is called an: Acute Angle
382. An angle measuring exactly 90 degrees is called a: Right Angle
383. If a train travels at a constant speed of 60 km/h, the distance covered in 2.5 hours is: 150 km
384. Solve the mathematical expression 15 + 5 \times 2 - 4$ using order of operations: 21
385. Solve the expression $(12 - 4) / 2 + 6 using order of operations: 10

386. The mathematical probability of obtaining Heads in a single fair coin toss is: 1/2 (0.5)

387. The probability of rolling a 6 on a fair standard 6-sided die is: 1/6

388. If a = 3$ and b = 4$, then the value of a^2 + b^2 is: 25

389. The geometric theorem relating sides of a right triangle ($c^2 = a^2 + b^2$) is the: Pythagoras Theorem

390. If the cost price is Rs. 500 and the selling price is Rs. 600, the profit percentage is: 20%
391. If the cost price is Rs. 1000 and the selling price is Rs. 800, the loss percentage is: 20%
392. Add the fractions 1/2 + 1/4: 3/4
393. Multiply the fractions (3/5) x (10/9) to simplest form: 2/3
394. The value of any non-zero real number raised to the power of 0 is: 1
395. The sum of the first 5 positive integers (1 + 2 + 3 + 4 + 5) is: 15
396. The numerical difference between the largest 3-digit number and smallest 3-digit number is: 899
397. If $x + y = 20$ and $x - y = 4$, the value of x is: 12
398. If $x + y = 20$ and $x - y = 4$, the value of y is: 8
399. A two-dimensional geometric polygon with 5 sides is called a: Pentagon
400. A two-dimensional geometric polygon with 8 sides is called an: Octagon

401. The primary electronic hardware component responsible for executing instructions in a computer is the: CPU (Central Processing Unit)
402. Short-term volatile main memory used by the CPU to hold active program data is: RAM (Random Access Memory)
403. Non-volatile internal memory containing permanent boot instructions (BIOS) is: ROM (Read-Only Memory)
404. In Microsoft Word, the standard keyboard shortcut to Copy highlighted content is: Ctrl + C
405. In Microsoft Word, the standard keyboard shortcut to Paste copied content is: Ctrl + V
406. In Microsoft Word, the keyboard shortcut to Undo the previous action is: Ctrl + Z
407. In Microsoft Word, the keyboard shortcut to Redo the previously undone action is: Ctrl + Y
408. In Microsoft Word, the keyboard shortcut to Select All document contents is: Ctrl + A
409. In Microsoft Word, the shortcut key to Save the active document is: Ctrl + S
410. In Microsoft Word, the shortcut key to open the Print dialog menu is: Ctrl + P
411. In Microsoft Word, the keyboard shortcut to open the Find and Replace window is: Ctrl + H
412. In Microsoft Excel, the grid box formed by the intersection of a column and a row is a: Cell
413. In Microsoft Excel, all software formulas and calculations must begin with the operator: Equal Sign (=)
414. In Microsoft Excel, the built-in function used to sum a range of selected numbers is: SUM
415. In Microsoft Excel, the keyboard shortcut to instantly insert a new worksheet is: Shift + F11
416. In Microsoft PowerPoint, the shortcut key to start a presentation from the first slide is: F5
417. In Microsoft PowerPoint, the shortcut key to start a presentation from the active slide is: Shift + F5

418. Individual screens or display pages within a Microsoft PowerPoint presentation are called: Slides
419. The fundamental unit of digital computer data storage representing a binary 0 or 1 is a: Bit
420. A consecutive grouping of 8 binary bits is equal to 1: Byte
421. One Kilobyte (KB) of computer data memory consists of: 1024 Bytes
422. One Megabyte (MB) of computer data memory consists of: 1024 Kilobytes
423. One Gigabyte (GB) of computer data memory consists of: 1024 Megabytes
424. One Terabyte (TB) of computer data memory consists of: 1024 Gigabytes
425. An operating system like Microsoft Windows or Linux is categorized as: System Software
426. Applications like Microsoft Word, Excel, and Chrome web browser are categorized as: Application Software
427. The main primary circuit board that holds CPU, RAM, and expansion slots is the: Motherboard
428. The secure network protocol used for encrypted web communication across the Internet is: HTTPS
429. The technical acronym URL in web context stands for: Uniform Resource Locator
430. The acronym IP in computer networking context stands for: Internet Protocol
431. A computer network connecting devices within a limited localized area like an office is a: LAN (Local Area Network)
432. A wide computer network covering extensive geographic regions across cities or countries is a: WAN (Wide Area Network)
433. The short-range wireless networking standard used for connecting devices to local networks is: Wi-Fi
434. The Windows keyboard shortcut used to permanently delete selected items bypassing the Recycle Bin is: Shift + Delete
435. In Microsoft Windows, the shortcut key used to rename a selected file or folder is: F2
436. The function key used to refresh the active window or web page browser is: F5
437. The standard default file extension for documents saved in modern Microsoft Word is: .docx
438. The standard default file extension for workbooks saved in modern Microsoft Excel is: .xlsx
439. The standard default file extension for presentations saved in modern Microsoft PowerPoint is: .pptx
440. The technical document file format abbreviation PDF stands for: Portable Document Format
441. Any malicious software intentionally designed to cause damage or unauthorized access to systems is: Malware
442. Fraudulent attempts to steal passwords or sensitive data via deceptive communications are called: Phishing
443. A network security system that monitors and filters incoming and outgoing network traffic is a: Firewall

444. The key on a standard keyboard used to cancel ongoing operations or exit menus is: Escape Key (Esc)
445. Extremely fast small memory located between the CPU core and main RAM to speed up processing is: Cache Memory
446. The primary visual output display monitor connected to a desktop computer is an: Output Device
447. Computer peripheral hardware like keyboards, computer mice, and document scanners are: Input Devices
448. Computer peripheral hardware like monitors, printers, and audio speakers are: Output Devices
449. The internal CPU component that performs mathematical calculations and logic evaluation is the: Arithmetic Logic Unit (ALU)
450. The internal CPU component that directs operational hardware traffic and instruction execution is the: Control Unit (CU)
451. The computing acronym GUI stands for: Graphical User Interface
452. The direct keyboard shortcut used to open Windows Task Manager is: Ctrl + Shift + Esc
453. In word processing software, the feature that automatically shifts text to the next line at margins is: Word Wrap
454. The initial process of powering on or initializing a computer operating system is: Booting
455. The process of restarting a computer system while it remains powered on is called: Warm Booting
456. Turning on a computer system from a completely powered off state is called: Cold Booting
457. A clickable text link or image that navigates the user to another web page or document is a: Hyperlink
458. The keyboard shortcut used to insert a Hyperlink into Microsoft Word text is: Ctrl + K
459. A programming language translator that converts code line-by-line during execution is an: Interpreter
460. A programming language translator that converts the entire source code into machine code prior to execution is a: Compiler
461. The lowest level of computer programming code directly understood by CPU hardware is: Machine Language
462. The standard maximum data storage capacity of a traditional Compact Disc (CD) is approximately: 700 MB
463. The standard single-layer storage capacity of a traditional Digital Versatile Disc (DVD) is approximately: 4.7 GB
464. In Microsoft Word, the keyboard shortcut to Center-align highlighted text is: Ctrl + E
465. In Microsoft Word, the keyboard shortcut to Left-align highlighted text is: Ctrl + L
466. In Microsoft Word, the keyboard shortcut to Right-align highlighted text is: Ctrl + R

467. In Microsoft Word, the keyboard shortcut to Justify text evenly across margins is: Ctrl + J

468. In Microsoft Word, the shortcut key used to apply Bold formatting to text is: Ctrl + B

469. In Microsoft Word, the shortcut key used to apply Italic formatting to text is: Ctrl + I

470. In Microsoft Word, the shortcut key used to apply Underline formatting to text is: Ctrl + U

471. The unique numerical identifier assigned to every device connected to the Internet is an: IP Address
472. The networking acronym DNS stands for: Domain Name System
473. The primary internet protocol used specifically for transmitting outgoing email messages is: SMTP
474. The protocol utilized by email client applications to retrieve messages from a server is: POP3 / IMAP
475. A temporary holding area in system RAM for data cut or copied by the user is the: Clipboard
476. The shortcut key used to Cut selected text or files is: Ctrl + X
477. The shortcut key used to create a New blank document in Microsoft Word is: Ctrl + N
478. In Microsoft Excel, horizontal data lines designated by row numbers are called: Rows
479. In Microsoft Excel, vertical data structures designated by column letters are called: Columns
480. An individual Microsoft Excel file containing one or multiple worksheets is called a: Workbook
481. The Excel feature used to temporarily display only specific rows matching defined filter criteria is: Filter
482. In Microsoft Word, text or graphic content printed continuously across top margins of pages is the: Header
483. In Microsoft Word, text or graphic content printed continuously across bottom margins of pages is the: Footer
484. The short-range wireless radio technology used to pair peripherals with computers is: Bluetooth
485. The single smallest illuminated dot element forming a digital image on a screen monitor is a: Pixel
486. The optical disc storage format utilizing blue-violet laser technology for HD video is: Blu-ray Disc
487. The disk management utility software used to consolidate fragmented files on hard drives is: Disk Defragmenter
488. The primary default document layout view in Microsoft Word displaying printed appearance is: Print Layout View
489. Keyboard keys like Ctrl, Alt, and Shift used in conjunction with other keys to perform shortcuts are: Modifier Keys
490. In Microsoft Excel, the currently highlighted cell bounded by a thick active border is the: Active Cell
491. The function key used to open the "Save As" window directly in Microsoft Word is: F12
492. The function key used to initiate a automatic Spelling and Grammar check in Microsoft Word is: F7
493. The computer character encoding standard acronym ASCII stands for: American Standard Code for Information Interchange
494. The hardware connection acronym USB stands for: Universal Serial Bus
